Jody Bailey

Web Developer

PROFESSIONAL PROFILE

I am a self-motivated, tenacious, and ambitious young individual with a dedication towards managing and creating beautiful, interactive, and dynamic websites that engages user interaction.

I enjoy working in a constantly changing environment in the tech industry and being part of thriving and developing teams. With my strong sense of maintaining a diligent and efficient work ethic and creating a productive and organized atmosphere, I am willing to offer my capabilities to a team searching for young talent.

- Aptitude in organization.
- Adaptive working schedule.

- Communicating effectively and timely whenever an issue arises.

HOBBIES AND INTERESTS

Computer Systems

Becoming more knowledgeable on the components of a PC and how it affects applications and performance has always fascinated me and I continue to learn more about different systems and how they work. Along these comes my understanding of applications such as Excel, Word, PowerPoint, and others. Creating something I can call my own is the feeling I strive for, and that is why creating and perfecting code is my passion.

Volunteer Work

I have obtained 20 hours of volunteering work at a local orphanage and through meeting many different individuals with varying personalities, have gained a better sense of social interactions and conversational skills.
